Final Feedback:

- Amazing outcome! Just make sure that the fonts are the same throughout the page. I see that the Style page has a different font from the other tabs.
- The only adjustments I have are for the Products page:
    - Make sure that the colors aren't eye straining, possibly the colors below will work?
    - There's a banner of the first image that repeats behind "popular items" section that should be removed
    - The grid on this page can just be 3x2
    - More spacing above "07 Packaging" text section!
